The Trail System at BVORR is extensive and would probably take 2-3 days to run all of the trails.

The trails are technical trails, hill climbs and off camber that honeycomb throughout 300 acres of

an old gravel pit system. The trail base is gravel, sand and dirt with some hard clay.

The land owner discourages purposeful mudding as he feels this is not consistent with tread lightly.

In the event the trails have to be closed due to weather refunds may be given.

Trail Map. Bonner has made excellent progress toward the trail map. Please go to the following link:

Currently BVORR management is looking for trail guides.

If interested in becoming a trail guide please contact management.
